

Date: 22-09-2026

Place/Platform: IEETA / In-Person **Time:** 10:00 - 11:00

Participants - Bernardo Santos - Daniel Rodrigues - Dinis Sousa - Duarte Candeias - Pedro Gonçalves - Daniel Ferreira

| 1. Meeting Objective

Define the main goals, presentation structure, and organisational setup for the Defiro project (municipal workflow engine).

| 2. Discussion and Decisions

Topic 1: Project Objectives

- Reduce time wasted in manual procedures
- Increase convenience of the process
- Speed up/handle service requests

Topic 2: Research Question

- Are there existing platforms that already implement what we want to build? → State of the Art research needed before proceeding

Topic 3: Presentation Structure

1. Define Use Cases
2. State of the Art — comparison table of similar solutions
3. Define the problem being solved:
 - What already exists
 - What we propose to improve
 - Timeline/expectations

Topic 4: Branding & Website

- Need a project website and presentation
- Define visual identity for the project (logo sketches for “defiro” already started)

Topic 5: Slides

- Title slide
- Short project summary

Topic 6: Team Setup

- Create GitHub organisation
 - Create Google account under the project name
 - Set up Drive under that account
 - Create a “Meetings” folder in Drive
 - Define what will be discussed in each meeting (agenda)
-

| 3. Action Items

Task	Owner	Deadline
Create GitHub organisation		27-09-2026
Create Google account & Drive		27-09-2026
Define visual identity/logo		27-09-2026
Draft Use Cases		27-09-2026
State of the Art table		27-09-2026
Build project website		27-09-2026
Prepare presentation slides		27-09-2026
